ProjectManager application

This page will help you install and build the ProjectManager app.

Prerequisites:

- Download ProjectManager app - https://mega.nz/#!Lsl2SAzS ;
  Decription Key: !hqNnp19FXcyGr_GrSJD7DFnCSAWgNlgql5zV64IfEbY
- Installed Node - https://nodejs.org/en/download/,
- Installed Expo app on Android/iOS device - https://expo.io/,
- Opened command line

Unzip the ProjectManager archive, then, through the command line utility, navigate to the ProjectManager app folder and type **npm start** e.g.:

```
cd .\ProjectManager
npm start
```

This will start a development server for you, and print a QR code in your terminal.

Running ProjectManager application

On your iOS or Android phone connect to the same wireless network as your computer. Using the Expo app, scan the QR code from your terminal to open the project.
